

The Chrome logo is a circular icon composed of four segments in red, yellow, green, and blue, arranged in a pinwheel pattern. In the center is a white circle containing a blue circle.

A Whirlwind Tour of Chrome Development

Cait Phillips

Getting Started:

<http://www.chromium.org/developers>

- Get the source code
- Get instructions to build the source code
- Design docs, style guide, etc.

Troubleshooting:

<https://groups.google.com/a/chromium.org/forum/#!forum/chromium-dev>

- Search past threads or...
- Join the group and post (warning: high volume!)

Finding a Starter Bug:

<http://crbug.com>

- File a bug or fix a bug.
- Search for “GoodFirstBug” to find candidates that have been flagged as good starter bugs.

Navigating the code:

<http://codesearch.chromium.org>

- (Mostly) cross-referenced search engine for Chromium source code
- See the SVN history of a file
- See who last changed the line you're looking at

Reviewing the code:

<http://codereview.chromium.org>

- Give and receive code reviews

Why code reviews are awesome:

<http://notwaldorf.github.io/posts/code-reviews/>

Testing and Committing the Code:

<http://dev.chromium.org/developers/testing/commit-queue>

- Runs your patch through a litany of tests, if they all pass*, then the code gets committed.

<http://build.chromium.org>

- Runs your patch through yet more tests!

More resources:

- Our IRC Channel: irc.freenode.net/#chromium -- ask questions or peruse the logs: <http://echelog.com/logs/browse/chromium/1396303200>
- Ping me: caitkp@chromium.org

Thanks!
